- English

## About Me

I am passionate about front-end development to create user-friendly websites. With 1 years of experience working with HTML/CSS, JavaScript and ReactJS, I have developed strong capabilities in these technologies. I pride myself on my ability to quickly learn new skills, work effectively in teams, and communicate well.

## Experience

### Website NFT Marketplace

4/2023 - 6/2023

Description: Electronic sales website, allowing users to log in, post products for sale, buy online and make electronic payments.

Technologies: ReactJs , Redux

Github : [https://github.com/vuvandinh123/react\\_web\\_nft](https://github.com/vuvandinh123/react_web_nft)

### Website Ecommerce

6/2023 - 1/2024

Description: Electronic sales website, allowing users to log in, post products for sale, buy online and make electronic payments.

Technologies: ReactJs, Tailwindcss

Github : [https://github.com/vuvandinh123/laravel\\_ecommence\\_website](https://github.com/vuvandinh123/laravel_ecommence_website)

## Activities

### Join students who are good at website design

Throughout the competition, I actively engaged in conceptualizing, designing, and implementing innovative website solutions. Leveraging my expertise in HTML, CSS, and JavaScript, I crafted visually appealing and functional websites that addressed specific project requirements.
